

Warmest greetings - Management Stakeholders,

It is with pleasure that I am presenting to you my proposal to apply for a Senior Web Developer career opportunity with your company. I have reviewed the complete job description that was provided, and I am highly confident that I uniquely fulfill all aspects of the job as described. I would like to express my sincere interest in this position by providing my skill sets and experience credentials herein.

I am a US-born and English-speaking professional front-end/server-side senior web developer. I am considered a dual Full-stack Developer:

- JavaScript MEVN (MongoDB, Express.js, Vue.js & Node.js)
- PHP LAMP (Linux OS, Apache, MySQL 5 & PHP 7)

I possess extensive experience and skill sets in:

HTML5, CSS3, jQuery, JavaScript, PHP 7/Laravel/MySQL 5, AJAX/JSON/XML, Vue.js/Vuex/Nuxt/Vuetify, Node.js/Express.js/MongoDB, PWA/AMP/IndexedDB, Electron/Photon, SEO/SEM/SMM, UI/UX, Karma/Mocha/Jest, Git/GitHub, Linux/Apache/Redhat, Visual Studio Code/Android Studio, Adobe Creative Cloud (Photoshop, Illustrator & InDesign), plus, WordPress 5+, Joomla, Drupal 8+, Shopify and Magento 2+.

My project count since 1995 is over 450 websites created, with clients located all over the world, but I specialize in meeting the needs of U.S. companies and individuals. My focus is on developing practical business solutions, using an array of mature and proven strategies, components and software solutions to solve common business website requirements and digital marketing needs.

I have been developing e-commerce websites and creating online software solutions since 1995 via my private web development and digital marketing agency, Max Media Group, LLC.

I am currently reinventing myself, and am inspired by the idea of a long-term commitment, via either contract or employment, as a web developer actively taking on a senior mentorship role as an integral team member at an independent company whose main goal is to improve the lives of others.

Sincerely,

Max Cannon

OBJECTIVE

I'm 7.5 in dog years and recently moved to Tennessee one month ago. I enjoy the scenery, the weather and the genuine generosity of the people who live here. This has allowed me a fresh and renewed perspective about myself and has ignited a passionate desire to work for a solid company with a good reputation that actually has as its goal to improve the lives of people. I want to employ the cutting-edge modern tech skills I have garnered towards a common goal within a vibrant team of people in my role as an inspirational mentor.

- ♦ MySQL DB - 24 years
- ♦ Node/Express - 5 Years
- ♦ MongoDB - 5 Years
- ♦ Linux/Apache - 25 years

MAX CANNON | Senior Web Developer

Stack One

MEVN

MongoDB, Express.JS,
Vue.js & Node.js

This entire JavaScript stack revolves around my intense enthusiasm for the entire front-end Vue.js eco-system.

"Every day I learn something new about Vue - I wake excited about frontend tech..."

Stack Two

LAMP

Linux OS, Apache,
MySQL, PHP 7

I still have love for this stack that manages the entire web front to back: HTML, CSS, JavaScript, PHP, Apache, and Linux.

"Like good rock 'n roll tunes, some old school web technologies never go out of style..."

Employment:

Max Media Group
CTO | Senior Web Developer
1995 - present
